

# Financing the Growth Economy through Digital Credit - Part II

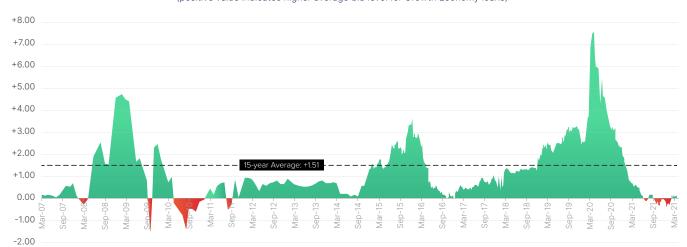

In our previous 2021 whitepaper, we highlighted that "Growth Economy" loans (e.g. telecom, IT, financials, healthcare) represent 43% of the leveraged loan market compared to 64% of the equity market. This means private credit investors are generally underweighted to Growth Economy assets and overweighted to the "Old Economy" (e.g. manufacturing, consumer goods, real estate). In this whitepaper, we dive deeper into the credit side of Growth vs. Old Economy sectors by exploring price volatility and market growth among levered loans. Historical performance indicates that private credit investors who overweight loans to Growth Economy businesses may experience higher growth, lower volatility and superior investment performance.<sup>2</sup>

# **Loan Pricing Volatility**

In periods of market distress, Growth Economy Ioan prices have traded significantly better than Old Economy Ioan prices. Throughout the past 15 years, Growth Economy Ioan prices have averaged +1.51 points higher than Old Economy Ioans (i.e., an average price of 97.01 for Growth Economy Ioans vs. 95.50 for Old Economy Ioans). Amid the volatile markets of 2008-09, 2015 and 2020, the average Growth Economy Ioan pricing advantage increased to +2.91 points. In the latest April 2022 YTD market disruption, which featured a rotation away from

high-growth equities into more traditional value stocks, Growth Economy equity industries in the S&P 500 fell -16.9% on average, while Old Economy equities fell by -1.7%. Yet in the loan market, Growth Economy loan prices fell only -1.0% during the same time period, outperforming a -1.4% decline in Old Economy loan prices. This divergence supports our view that Growth Economy equity investors have been absorbing the recent contraction in valuations, while loan investors have largely been insulated.

# **Leveraged Loan Market Growth**

An analysis of levered loan par value over time shows that the Growth Economy credit market is also growing faster, in addition to being less volatile, than Old Economy loans. While historical pricing levels suggest that Growth Economy levered loans demonstrate less volatility than Old Economy assets, in the five years since 2017, total Growth Economy outstanding par value has grown at a 10.7% CAGR, which is a +2.0% faster growth rate than Old Economy loans.

# Conclusion

This historical analysis of levered loan pricing and volume suggests that Growth Economy loans are less volatile, especially in periods of market distress, and are part of a faster growing market. Investors may want to tailor their exposure to favored industries that exhibit these strong characteristics over the long-term, which may be difficult to achieve with the preponderance of managers offering diversified portfolios overweighted to the Old Economy. Digital credit offers private credit managers direct access to the Growth Economy and its supportive secular tailwinds.

A successful digital credit strategy requires the expertise of both a sector specialist and a traditional private credit manager. Large and growing demand from issuers in the digital realm, driven by significant infrastructure capital expenditures, allows private credit lenders with digital expertise to be well-positioned for rapid deal flow, proper assessment of sector-specific dynamics and generation of attractive risk-adjusted returns. The broader DigitalBridge platform has over two decades of private credit expertise combined with operational and investing experience, and has forged strong relationships managing mission-critical network infrastructure with some of the world's largest and most profitable companies.

The confidential information contained in this paper (the "Information") has been prepared by DigitalBridge Investment Management, LLC (the "Manager") for the sole purpose of providing certain sophisticated parties with the Manager's current view of the digital infrastructure private credit investment landscape (investments therein, "Investments"). The Information is not, and under no circumstances is it to be construed as, a prospectus or an advertisement and any future discussions regarding the Information are not, and under nocircumstances are to be construed as, an offer to sell or a solicitation or offerto purchase any securities in any jurisdiction. Any offer or sale of securities may in certain jurisdictions be restricted by law and recipients should inform themselves about, and observe, any such restrictions.

No reliance should be placed upon the Information in deciding whether to make an Investment. The Information is subject to withdrawal, cancellation or modification without notice. Statements in the Information are made as of a certain date in the past, and the delivery of the Information at any time shall not under any circumstances create an implication that the Information is correct as of any time subsequent to such date in the past. Recipients should not treat the contents of the Information or any prior, or subsequent, communications from the Manager or its affiliates or any of its or their partners, members, shareholders, managers, directors, officers, employees, agents, representatives and/or consultants ("Manager Parties") as advice relating to legal, taxation, ERISA or investment matters or as a recommendation to pursue or make Investments and are advised to consult their own professional advisers concerning the acquisition, hold or disposal of investments.

All projected returns discussed herein are presented on a gross basis, meaning they do not reflect the deduction of management fees, carried interest, taxes or other expenses which may be charged by parties arranging or managing Investments and may substantially reduce the returns received by investors. All projected returns discussed herein are subject to uncertainties, changes (including changes in economic, operational, political or other circumstances) and other risks, all of which are beyond the Manager's control and any of which may cause the relevant actual, financial and other results to be materially different from the results expressed or implied by such projected returns. Industry experts may disagree with the projected returns, the estimations and assumptions used in preparing the projected returns or the Manager's view or understanding of the private credit market. No assurance, representation or warranty is made by any person that any of the projections contained herein, including any projected returns will be achieved and no recipient should rely on such projections or the projected returns. Recipients upon request may obtain additional information relating to the projections and projected returns described herein.

An investment entails risks and no representation can be or is made, and no warranties or assurances can be or are given, that any statement of opinion and/or belief or any views, projections or statements relating to expectations regarding future events in relation to private credit are correct. In reviewing the past performance information contained in the Information, recipients should bear in mind that past performance is not indicative of future performance. In addition, any forward-looking statements (including, without limitation, projections of future earnings)

contained nerein are subject to known and unknown risks, uncertainties and onter factors which may cause actual results to be materially different from those contemplated in such statements. Recipients must realize that they could lose all or a substantial amount of their investment in private credit. Benchmark comparisons are provided for illustrative purposes only. Comparisons to benchmarks have limitations because benchmarks are unmanaged and have volatility and other material characteristics that may differ from specific Investments. Also, performance results for benchmarks do not reflect payment of investment management or performance fees and other expenses. Because of these differences, recipients should carefully consider these limitations when evaluating the performance in comparison to benchmarks.

To the fullest extent possible, by accessing the Information, you release the Manager and each of the Manager Parties in all circumstances from any liability whatsoever and howsoever arising from your use of the Information. Accordingly, none of the Manager or any of the Manager Parties shall be liable for any loss (whether direct, indirect or consequential) or damage suffered by any person as a result of relying on any statement in, or omission from, the Information or in, or omitted from, any other information or communications provided. The Information contains statistics and other data that have been obtained from or compiled from information available by third-party service providers; the Manager has not independently verified such statistics or data.
